Introduction

Dear Customers:
Thank you purchasing this 5.1channel home cinema system. We recommend that you Carefully study the operating Instructions before attempting to operate the unit and that You read the listed safety information.

Introduction

Caution: Read this section carefully to safely opperate your equipment:

1. **Suffocation**-After raking the unit out of the polyethylene bag, be sure to dispose of the polyethylene bag out of the reach of children. The bag is not a toy and can become a suffocation hazard.

2. **Water and moisture**-The appliance should not be used near, water, near a bathtub, wash bowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, etc.

3. **Heat**-Do not install the unit near a source of heat, such as radiators, or under direct sunlight.

4. **Modification**-Do not attempt to open or modify the unit. Modification could cause a fire hazard or malfunction.

5. **Cleaning**-Do not use volatile solvents such as alcohol, paint thinner, gasoline, or benzine, etc. Use a clean dry cloth to clean the cabiner.

6. **Abnormal smell**-If an abnormal smell or smoke is detected, immediatelly turn the power OFF and unplug the appliance from the wall outlet. Contact your dealer or nearest service center.

About Using Speakers Near a TV

This speaker includes magnetic shielding and can therefore be installed close to a TV set. Note, however, that placing spealers too close to a TV may in some cases produce distortion in the Color reception, In such case, turn on the TV and check that color reproduction is normal. If Color is distorted, turn the TV off for 15 to 30 minutes, then turn it back on and check again. (This allows the TV degaussing circuitry to correct for the magnetic field from the speakers.) If distorion is still present, move the speakers further from the **TV.**

Connections1 (If you use 5 channel output amplier, please refer this connection)

Be sure to turn off your amplifier before connecting.
